

Project Name: FitBuddy - AI Workout Generator **Project Execution Plan:**

- **Phase 1:** Requirement gathering and UI/UX template design.
- **Phase 2:** Backend development (FastAPI server setup and SQLite database integration).
- **Phase 3:** AI Integration (Connecting and prompting Google Gemini API with fallback timeout handling).
- **Phase 4:** Testing (Performance testing and fixing API rate limit errors).
- **Phase 5:** Final GitHub repository structuring, video demonstration, and project documentation.
