

Project Name: FitBuddy - AI Workout Generator

System Data Flow:

- **Step 1:** UI (HTML Form) -> Sends User Metrics via POST Request.
- **Step 2:** Backend (FastAPI routes.py) -> Receives and processes the payload.
- **Step 3:** External API -> FastAPI sends a crafted prompt to Google Gemini API (gemini-3.5-flash-lite).
- **Step 4:** Database (SQLite) -> Stores the returned Workout Plan and User ID.
- **Step 5:** Response -> Jinja2 Template renders the final output back to the User's browser.
