

Project Name: FitBuddy - AI Workout Generator

Functional Requirements:

- Must collect user age, weight, goals, and intensity preferences.
- Must generate a 7-day customized plan using Generative AI.
- Must store user inputs and generated plans in a relational database.

Non-Functional Requirements:

- **Performance:** Fast load times with seamless fallback mechanisms (timeout handling) during API latency.
- **Usability:** Clean and responsive UI using HTML/CSS.
