

1. PROJECT OVERVIEW

- **Project Title:** FitBuddy - AI Workout Generator

2. HIGHLIGHTS OF CAPABILITIES The project demonstration validates the practical implementation of FitBuddy, proving its capability to act as an automated, highly personalized virtual fitness trainer.

3. CORE FEATURES TO BE SHOWCASED

- **Responsive Data Capture:** Showcasing the intuitive HTML/Jinja2 interface that captures specific physical metrics without requiring complex user navigation.
- **Rapid AI Generation (Gemini-3.5-Flash-Lite):** Demonstrating the integration of the high-speed Google Gemini model to dynamically synthesize a 7-day workout and nutrition plan in under 4 seconds.
- **Resilient Exception Handling:** Highlighting the backend's stability by explaining the integrated 10-second timeout mechanism designed to gracefully mitigate 429 Quota Exceeded and 504 Deadline Exceeded API errors.
- **Relational Data Persistence:** Exhibiting the SQLAlchemy integration by accessing the /all-users Admin Dashboard, proving that every generated plan is permanently stored in the SQLite database
