

1. PROJECT OVERVIEW

- **Project Title:** FitBuddy - AI Workout Generator

2. INTRODUCTION TO PROBLEM-SOLUTION FIT :

The Problem-Solution Fit analysis validates that the FitBuddy application effectively addresses a significant gap in the personal health and fitness market.

3. IDENTIFYING THE CORE PROBLEM:

A fundamental issue in the fitness industry is that standard fitness plans do not work for everyone. Generic templates fail to account for critical physiological differences. Individuals possess unique metrics—such as their specific age and weight—as well as distinct fitness goals (e.g., weight loss) and varying tolerances for workout intensity. Relying on one-size-fits-all workout routines can lead to suboptimal results or increased risk of injury, while hiring professional human trainers is often too expensive for the average beginner.

4. THE PROPOSED SOLUTION (FITBUDDY):

To solve this, the team proposes FitBuddy, a personalized AI-driven fitness planner. Built on a fast and modern web framework, the application utilizes Generative AI to dynamically generate customized 7-day workout plans alongside targeted nutrition tips.

5. ALIGNING THE SOLUTION WITH THE PROBLEM

- **Problem:** Generic plans ignore individual body metrics.
 - **Solution Fit:** FitBuddy dynamically tailors the generated workout routines specifically based on the user's inputted age, weight, personal fitness goals, and preferred intensity levels.
- **Problem:** Users need immediate, accessible guidance without high costs.
 - **Solution Fit:** The application provides a seamless user experience, moving rapidly from initial data input to real-time AI generation.

- **Problem:** Users lose track of their customized plans over time.
 - **Solution Fit:** The system incorporates a relational database to persistently store user data and the generated plans for future retrieval.

6. CONCLUSION :

FitBuddy perfectly aligns with the identified problem by democratizing access to highly personalized fitness planning. By leveraging Generative AI, it provides tailored, safe, and goal-oriented workout schedules instantly.
